THD Electronics Releases the Highly Anticipated 1x12" Combo Cabinet

SEATTLE, WA - After years of producing a line of award-winning guitar amplifiers and speaker cabinets, THD finally introduces a new Combo Cabinet for its line of guitar amps. After a stellar showing at the National Association of Music Merchants (NAMM) summer show, THD's 1x12" Combo Cab was a hit before it was ever released.

First unveiled at summer NAMM 2007 in Austin, Texas, the 1x12" Combo Cab was met with much success. Anticipation was high despite the relative low turnout for the event. CEO Andy Marshall minces no words. "It's one of the best sounding cabinets I've ever heard," he said "It's every bit as full and tight as our 2x12" cabinet, but smaller and it records beautifully."

The 1x12" Combo Cab utilizes a tuned port, bass reflex design, employing proprietary techniques to eliminate the standing-waves that haunt typical ported cabinets. The cabinet has been custom-tuned for a single THD "Vintage 12" speaker, which has a sweet, clear treble and a full, tight bass response. Like all THD speakers, the "Vintage 12" is hand-treated and custom-aged to remove the harshness normally associated with new speakers. Tone and technology aside, perhaps most exciting aspect of this new product is its flexibility. The 1x12" cabinet's design allows it to be easily retrofitted with any of THD's current line of amplifiers, including the UniValve, BiValve-30, Flexi-50 and the soon to be released Deco-36. The 1x12" Combo is also being offered as an "empty box," ready to bolt an already existing THD Amplifier chassis into.

THD's 1x12" features the elegant design and quality manufacturing typical of THD products. Under its sleek black exterior, it is constructed of thirteen-ply birch, joined with interlocking dado edge joints with the MDG speaker baffle fully dadoed into the sides, top and bottom of the cabinet making it extremely durable and road-worthy. Switchcraft plugs and Belden wire ensure the combo cabinet will sound great and hold up to even the most rigorous gigging schedule. Another feature unique to the 1x12" is its included wheels which simply slide into the inset caster plates. Combined with its small size (20.5"x22.9"x12.5") the 1x12" combo is one of the most easily-transported cabinets ever produced by THD.

The 1x12" combination cabinet is already shipping. For more information or to locate a dealer, visit THD's website, www.thdelectronics.com.

THD Electronics is a guitar amplifier, speaker cabinet and amplifier accessory manufacturer located in Seattle, Washington. For over twenty-one years, THD has produced a wide range of award-winning guitar tube amplifiers, speaker cabinets, and related accessories. THD's customer list includes hundreds of professional musicians and has become a standard of excellence in the music industry. THD Electronics has several new products slated for release in 2008.
